

COMPASS draft answers — Dissertation Core Deck Handoff to VECTOR

Status: COMPASS prefill (2026-09-15). Pending Charles: items marked [CHARLES - ...].

Blank template: COMPASS_Dissertation_Core_Deck_Materials_Questionnaire.md

Charles checklist (what only Charles must do): ../re_entry/_DISPOSABLE_CHARLES_VECTOR_handoff_checklist.md

Provisional story arc (Alex/COMPASS):

Army discovery → cross-domain replication in NCAA men’s basketball and R1 academic tenure → simple Wang-style mechanism/model → model characterization → predictions and tests.

Charles must confirm or edit via flipbook red-pen + Step 4 judgment calls.

1. Current State

1.1 Canonical handoff

- COMPASS:
- 1. Read first: 3-Master_Plan/re_entry/_DISPOSABLE_paper_flipbook_PD30.md — slide claims Acts 0–VI (authority after Charles red-pen).
 - 2. Sequencing / gaps: 3-Master_Plan/re_entry/PAPER_Campaign_Plan.md
 - 3. Alex locks: transcripts/PD30_notes.md
 - 4. Orientation (not deck SSOT): 3-Master_Plan/re_entry/00_READ_ME_FIRST.md

1.2 Project map

COMPASS:

Doc	Role
3-Master_Plan/re_entry/01_The_Problem_in_Plain_English.md	Phenomenon + thesis
3-Master_Plan/re_entry/02_Three_Kinds_of_Model.md	Layer A/B/C; score ≠ select
3-Master_Plan/BINDING_Selection_is_its_own_step.md	BINDING three separations
3-Master_Plan/plans/20260721_hero_model_reset.plan.md	Longer working plan
3-Master_Plan/re_entry/HEROs_and_PASSes/PD20_22_campaign_big_picture.md	POST-QC MBB hero locks + Wang ladder

1.3 Major changes since VECTOR’s last close involvement

- COMPASS:
- PD29–PD30: Paper flipbook is P0 intellectual work; Army = scientific origin, MBB = Common Access Card gap replication, tenure = third leg.
 - Army PNGs (Sep 15): Extracted from executed AWS notebook → 3-Master_Plan/re_entry/HEROs_and_PASSes/army_sandbox/ (G1 partially unblocked; CAC refresh still open).
 - MBB reigning lock: last-ps · EW16 · poolq leave-one-out · mg10 · min20 · 2009–2021 (mbb_reigning_3x3_manifest.json).
 - Tenure PD29 lock: decision cohort · dept LOO · career rate · Q16 (tenure_pd29_3x3_manifest.json).
 - Folder naming drift: λ knockout sim outputs live in pass_b/ (CSVs present; side-by-side PNG may need regen — G2). p ablation in pass_c_rho/. Doc 04 “Pass B” = ρ, not λ — see §13.3.

1.4 Locked versus provisional

COMPASS:

Status	Items
LOCKED	Environment <code>L_net = B - D</code> ≠ advancement; advancement = score (<code>S_i</code> , λ) then select (top K) — <code>BINDING_Selection_is_its_own_step.md</code>
LOCKED	Three-layer model (outcome / mechanism / sim) — <code>02_Three_Kinds_of_Model.md</code>
LOCKED	Army-first narrative anchor (MBB stand-in while CAC out) — flipbook § Charles lock
LOCKED	MBB reigning spec — <code>sports_sandbox/data_story/mbb_reigning_3x3_manifest.json</code>
LOCKED	Tenure PD29 spec — <code>tenure_sandbox/data_story/tenure_pd29_3x3_manifest.json</code>
CURRENT BEST	Flipbook slide claims Acts 0–VI — drafted, pending Charles red-pen
CURRENT BEST	Army G1 from <code>army_sandbox/</code> extract (Sep 15)
CURRENT BEST	Alex v1 score <code>S_i = A_i - \lambda \cdot L_C</code> — <code>Model.pptx</code> / <code>540_READ_ME_SIM.md</code>
PROVISIONAL	Grandchild (LG) assign as canonical vs Parent/Child — <code>[CHARLES - deck canonical ASSIGN?]</code>
PROVISIONAL	Tenure formal Cox parallel (G3)
PROVISIONAL	Three-domain composite figure (composable, not built)
SUPERSEDED	14-doc print stack — <code>3-Master_Plan/archive/numbered_print_stack/</code>
SUPERSEDED	mg=0 HERO as canonical MBB porch — see <code>sports_sandbox/README.md</code>

2. Army — Discovery and Bedrock Evidence

2.1 Origin of the phenomenon

COMPASS minimum set:

Item	Path
Pipeline overview (SSOT)	<code>talent/documents/520_PIPELINE_COX_OVERVIEW.md</code>
Working notebook (repo)	<code>talent/talent_pipeline/520_pipeline_cox_working.ipynb</code>
Executed notebook (figure source)	<code>talent/Army_AWS_download/TALENT_NET_export_20260320-1000/520_pipeline_cox_working.ipynb</code> — 29 embedded PNGs, Cell 11+12 run
Slide interpretation	<code>talent/documents/Presentation_Interpretation_Run1_Slides_5-20.md</code>
Cox methods	<code>talent/documents/COX_METHODS_BRIEF.md</code> , <code>CR_AND_HR_FOR_DUMMIES.md</code>
Army→MBB handoff	<code>talent/documents/Army_to_College_Basketball_Replication_Handoff.md</code>

Key cells: Cell 11 — CIF bars on `z_pool_minus_mean_snr_fwd` (hero) and `z_tb_ratio_fwd_snr` (own top-block); Cell 12 + 12.6A — Cox quadratic on pool-minus-mean.
`[CHARLES - confirm reigning AWS export: 20260320 vs 20260421 folder]`

2.2 Canonical Army figures

COMPASS:

Figure	Path	One sentence	Type	Defense-ready?
G1 hero CIF	HER0s_and_PASSes/army_sandbox/ARMY_G1_pool_minus_mean_fwd_cif_b8.png	Promotion cumulative incidence vs pool-minus-mean (8 bins); inverted-U	Layer A porch	✓ extracted Sep 15; [CHARLES confirm]
Own-TB baseline	.../ARMY_own_tb_ratio_fwd_cif_b8.png	Own top-block ratio monotone with promotion CIF	Layer A control axis	✓
Partial effects	.../ARMY_partial_effects_pool_minus_mean.png	Cox quadratic curvature check	Formal check	✓
Extract manifest	.../army_sandbox/EXTRACT_MANIFEST.txt	Slot → AWS filename map	Meta	—
Regen	scripts/extract_army_figures_from_520_notebook.py	Notebook → sandbox	Code	—

2.3 Robustness and identification

COMPASS:

Core deck: Cell 11 CIF porch; Cell 12 quadratic Cox; flipbook Act I claims 1.2–1.4.

Backup / appendix: Presentation Interpretation Run1 Slides 5-20.md (backward pool-minus-mean sensitivity, Slides 11–17); talent/documents/COUNTERINTUITIVE_RESULTS_AND_RUNS.md ; optional army_sandbox/ARMY_cox_competing_risks_analysis_stdz.png .

Limitation (LOCKED in flipbook): own top-block ↔ pool-minus-mean $r \approx 0.93$ — CIF porch = headline; Cox = formal curvature check, not reduced-form causal identification.

2.4 Canonical Army terminology

COMPASS:

Use	Avoid
pool minus mean / pool-minus-mean (leave-one-out-style)	“star pool” without naming axis
senior-rater pool	vague “unit quality”
top-block (TB) ratio	undifferentiated “performance”
Layer A hero porch	calling hero “the model”
promotion CIF / competing risk attrition	draft/NBA language on Army slides

3. NCAA Men’s Basketball — Cross-Domain Replication

3.1 Canonical dataset/sample

COMPASS:

- Manifest SSOT: 3-Master_Plan/re_entry/HER0s_and_PASSes/sports_sandbox/data_story/mbb_reigning_3x3_manifest.json
- Talk track: .../MBB_DATA_STORY_plot_highlights.md
- Sandbox README: .../sports_sandbox/README.md (leave-one-out vs team mean, mg10 QC)
- Pipeline: sports/530_sports_pipeline.ipynb
- Empirical bundle: sports/scripts/pass_a_empirical_bundle.py

Lock: 2009–2021 · last college season · mg10 · min20 · ALLT · PPM z · poolq leave-one-out · EW16 · ever drafted · N = 22,795 / 615 drafted (~2.7%).

3.2 Canonical NCAA finding

COMPASS:

- 3x3 deck: .../sports_sandbox/data_story/MBB_DATA_STORY_reigning_3x3.png
- Reigning HERO (panel 9): .../sports_sandbox/hero/HER0_ew16_allt_min20_mg10_09_21_last_ps_perm_loo_ever_lastps_ew16.png
- POST-QC narrative: HER0s_and_PASSes/PD20_22_campaign_big_picture.md
- Empirical archive: HER0s_and_PASSes/pass_a/

3.3 LOO versus team-mean geometry

COMPASS:

- sports_sandbox/README.md — leave-one-out vs poolq, mg=0 vs mg=10 vs F-HERO
- MBB panel 5 (team interval overlap): manifest path under reigning_hero/basic_data_plots/REIGNING_team_interval_overlap_mg10_min20_09_21.png
- MBB panel 2 ($\hat{A}$ vs T_j): reigning_hero/basic_data_plots/REIGNING_BDP_Ai_Tj_...png
- Football pedagogy (optional Act V): football_sandbox/perf_story/FOOTBALL_usage_Tj_q16_ew16.png + LOO usage panel

3.4 Remaining QC/data issues

COMPASS:

- Weaker elite-tail dip vs Army ($\beta_2 \approx +0.002$ — middle rise, softer tail).
- Panel 7 CCT uses 2011–21 +DFT window (not full 09–21).
- Division filter blocked — SCOUT note in sandbox README.

[CHARLES – any QC issue you want flagged to Alex in deck?]

3.5 Must-show NCAA figures

COMPASS:

1. MBB_DATA_STORY_reigning_3x3.png — full porch
2. ../hero/HERO_ew16_allt_min20_mg10_09_21_last_ps_perm_loo_ever_lastps_ew16.png — reigning hero
3. ../fhero/BDP_Ai_draft_mass_ecdf_mg10_min20_09_21_allt_ppm_last_ps.png — own $\hat{A}$ monotone (panel 4)
4. ../basic_data_plots/REIGNING_team_interval_overlap_mg10_min20_09_21.png — leave-one-out motivation (panel 5)
5. [Optional] elite pond twin — ../_DISPOSABLE_elite_pond_loo_twin/ELITE_pond_loo_pw4p7_...png

4. R1 Academic Tenure — Third Domain

4.1 Dataset/outcome

COMPASS:

- Manifest: tenure_sandbox/data_story/tenure_pd29_3x3_manifest.json
- Overview: tenure/documents/TENURE_PIPELINEDOVERVIEW.md
- Gameplan: tenure/documents/TENURE_DATA_GAMEPLAN.md
- Notebook: tenure/540_tenure_pipeline.ipynb
- PD29 notes: transcripts/PD29_notes.md

Lock: decision year · infHM all resolved · dept LOO whole-dept · $\hat{A}$ = pubs per career year · Q16 · N $\approx$ 391 resolved.

4.2 Canonical tenure finding

COMPASS:

- 3x3: tenure_sandbox/data_story/TENURE_DATA_STORY_pd29_3x3.png
- Reigning HERO: tenure_sandbox/hero/HERO_tenure_q16_decision_dept_loo_infHM_slide.png
- Talk track: tenure_sandbox/data_story/TENURE_DATA_STORY_plot_highlights.md
- Act II probes (thin n): tenure_sandbox/act2/

4.3 Cross-domain mapping

COMPASS:

- Best crosswalk today: flipbook Acts I–III + PAPER_Campaign_Plan.md §0 — no single authoritative three-column table doc.
- Parallel structure: MBB and tenure 3x3 manifests (9-panel grid).
- Army→MBB explicit: talent/documents/Army_to_College_Basketball_Replication_Handoff.md

4.4 Domain-specific differences

COMPASS:

- Army: time-varying Cox, competing risks, largest N, strongest inverted-U.
- MBB: draft ever-Y, team-season grain, mg10 QC removed spurious mg=0 dip.
- Tenure: sparse N, metric choice moves porch (TENURE_PERF_METRIC_STORY*.png).
- All three: leave-one-out on peer pond; own-performance axis monotone separately.

4.5 Must-show tenure figures

COMPASS:

1. TENURE_DATA_STORY_pd29_3x3.png
2. ../hero/HERO_tenure_q16_decision_dept_loo_infHM_slide.png
3. TENURE_PERF_METRIC_STORY.png (+ TENURE_PERF_METRIC_STORY_p2.png sensitivity)
4. [Optional] tenure_sandbox/act2/CCT_tenure_rate_ai_band_dept_loo_pd29_z1_2_q8.png

5. Cross-Domain Empirical Phenomenon

5.1 Current best statement

COMPASS:

Scarce advancement plus strong peers produces a **repeatable hero-shaped outcome pattern** when binning advancement on **peer pond quality (leave-one-out)**, with own talent on a separate monotone axis. Signal strength: Army > MBB > tenure.

Source: flipbook § One-sentence thesis + PAPER_Campaign_Plan.md . [CHARLES – approve wording]

5.2 Common statistical object

COMPASS:

Domain	Operationalization
Cross-domain prose	BINDING Layer A = binned advancement rate vs leave-one-out pool quality
Army	<code>z_pool_minus_mean_snr_fwd</code> quantile bins → promotion CIF
MBB	<code>poolq_L00</code> EW16 bins → draft rate (LPM β_2 in manifest)
Tenure	dept LOO career rate Q16 → tenure rate ($\beta_2 \approx -0.017$)

No single canonical equation doc — `sports/documents/Hero_Model_Three_Layers_Memo.md` is shorthand reference (park until doc 02 is easy).

5.3 Cross-domain comparison visual

COMPASS: No pre-built three-domain figure. Composable from Army G1 + MBB panel 9 + tenure panel 9 (flipbook slide 3.3 prose). `build_flipbook_figure_deck.py` builds inventory/talk decks, not a composite.

5.4 Alternative explanations

Alternative	Where addressed
Own talent confounding	Separate $\hat{A}$ / own-TB panels all three domains
Team mean includes self	Leave-one-out pedagogy: football twin, MBB panel 5
Sample/QC (mg=0)	<code>sports_sandbox/README.md</code> , PD20_22 big picture
Metric choice (tenure)	<code>TENURE_PERF_METRIC_STORY*.png</code>
Causal peer effects	flipbook Act VI — not claimed

6. Theory and Literature

6.1 Core literature

Bucket	Repo pointers
Wang-style methodology	<code>HEROs_and_PASSes/PD20_22_campaign_big_picture.md</code> Part 1; flipbook G4 stub
Local competition / λ	<code>3-Master_Plan/re_entry/06_Lambda_threshold_and_KN_memo.md</code>
Assortative formation	<code>VECTOR_work/VECTOR_Bipartite_Assortative_Formation_Model.md</code>
Selection/advancement	<code>BINDING_Selection_is_its_own_step.md</code>
Alex magnitude (Phase C, parked)	<code>05_Alex_Magnitude_Spec.md</code>

`[CHARLES - exact Wang paper citation for §8.1 if locked outside repo]`

6.2 Companion/literature documents

- COMPASS:
- re_entry `01` – `08` under `3-Master_Plan/re_entry/`
 - `Model.ptx` / `Model.pdf`
 - `VECTOR_work/VECTOR_Saracco_Bomiriya_ASSIGN_Reading_Guide.md`
 - `VECTOR_work/VECTOR_Alex_ASSIGN_Configuration_Model_Response.md`
 - `VECTOR_work/Quayle_One_Page_Formula_Concept_Sheet.md` (if present)

6.3 Abandoned literature paths

- COMPASS:
- 14-doc stack: `3-Master_Plan/archive/numbered_print_stack/`
 - Big Fish domains: `HEROs_and_PASSes/_DISPOSABLE_big_fish_datasets_assessment.md`
 - Archived correspondence: `3-Master_Plan/archive/` , `obsolete/correspondence_rounds/`

7. Current Canonical Simple Model

7.1 Architecture

COMPASS:

Layer	Path
One-slide story	3-Master_Plan/re_entry/Model.pptx , Model.pdf
Plain English	02_Three_Kinds_of_Model.md
Pass A/B prose	04_Pass_A_and_Pass_B_in_Plain_English.md
Sim contract	sports/540_READ_ME_SIM.md
Execution order	3-Master_Plan/re_entry/model_OPORD.md
Code	sports/tier1_pool_assignment.py , tier1_generative_eda.py , tier1_sim_config.py

7.2 Levine–Gates (LG) ASSIGN

COMPASS:

Item	Path
COMPASS brief	VECTOR_work/COMPASS_BRIEF_ASSIGN_GRANDCHILD.md
Detailed instructions	VECTOR_work/COMPASS_DETAILED_ASSIGN_GRANDCHILD_INSTRUCTIONS.md
VECTOR formation spec	VECTOR_work/VECTOR_Bipartite_Assortative_Formation_Model.md
One-page homophilic model	VECTOR_work/VECTOR_One_Page_Homophilic_Initial_League_Model.md
Implementation	sports/tier1_pool_assignment.py (Parent/Child/Grandchild modes)
ρ calibration	sports_sandbox/reigning_hero/calibration/README.md ; slides CHAR_PD21_MLE_fit_13_21_HAND.pptx

Status: Grandchild = experimental arm per COMPASS brief. [CHARLES – LG vs Parent/Child for defense deck?]

7.3 SCORE

- COMPASS:
- Equation: $S_i = A_i - \lambda \cdot L_C$ (Alex v1; congestion only in score).
 - λ threshold: 06_Lambda_threshold_and_KN_memo.md
 - Phase B slides: 07_Phase_B_Characterization_Slides_Explained.md
 - λ knockout: CSVs in pass_b/ ; PNG path pass_b/PASS_B_generative_lambda_knockout_side_by_side.png — file not in repo as of Sep 15; regen via sports/scripts/pass_b_generative_knockout_bundle.py (G2)
 - Script: sports/scripts/pass_b_generative_knockout_bundle.py

7.4 SELECT

- COMPASS:
- v1: top K by score (deterministic).
 - Scarcity: K/N in tier1_sim_config.py ; θ from K/N — PD16 (08_PD16_Alex_meeting_takeaways.md).
 - BINDING: stochastic select = future step only.

7.5 Model behavior already demonstrated

COMPASS (point to evidence; do not rerun for confirmation):

Behavior	Evidence
λ=0 monotone vs λ>0 elite compression	pass_b/ CSVs + caption files; PNG G2
λ ablation sweep	pass_b/PASS_B_lambda_ablation_*.png (if present)
ρ → roster geometry / L_C	pass_c_rho/LC_distribution_vs_rho_*.png
ρ calibration / MLE	slides/CHAR_PD21_MLE_fit_13_21_HAND.pptx
Grandchild ρ sweep	slides/CHAR_grandchild_league_analysis.pptx

7.6 Known failures/discrepancies

- COMPASS:
- Sim bins **pool mean**; empirical hero bins **poolq leave-one-out** — qualitative proof-of-concept only (flipbook Act IV 4.2).
 - Bar-for-bar hero match **not** v1 gate (540_READ_ME_SIM.md).
 - Separate B(Q)/D(Q) curves **not** estimated (BINDING).
 - ρ→530 calibration gap — see PARKED_FOR_LATER.md .

8. Wang-Style Strategy

8.1 Exact Wang source

COMPASS: Methodological inspiration referenced throughout as “Wang-style arc” (phenomenon → minimal mechanism → prediction). Best in-repo summary: HEROs_and_PASses/PD20_22_campaign_big_picture.md Part 1.

[CHARLES – paste exact Wang paper citation if locked]

8.2 Modeling logic

COMPASS: Confirmed in flipbook + doc 01:

Empirical regularity → minimal mechanism → prediction → validation → extension

Pass structure: empirical hero (Layer A) → Pass A λ knockout → Pass B/C ρ (04_Pass_A_and_Pass_B_in_Plain_English.md).

8.3 Parameter classification

COMPASS:

Parameter	Class
ρ	Mechanism / assignment behavioral
λ	Scoring behavioral (congestion weight)
C (roster cap)	Structural constraint
K/N	Advancement scarcity / structural
N (league size)	Simulation choice

9. Predictions — Next Scientific Step

9.1 Predictions proposed

COMPASS: λ knockout comparative statics; ρ → within-team dispersion / L_C; θ(K/N) threshold; Alex Phase C magnitude (parked).

9.2 Predictions tested

COMPASS:

Test	Code	Output
λ knockout	sports/scripts/pass_b_generative_knockout_bundle.py	pass_b/ CSVs + captions; PNG G2
ρ ablation	sports/scripts/540_rho_ablation_bundle.py	pass_c_rho/
Grandchild ρ sweep	sports/scripts/grandchild_*.py	slides + diagnostics

9.3 Phase structure

COMPASS: Partial ρ slices in pass_c_rho/ ; λ ablation in pass_b/ . Full ρ×λ phase map **not complete** — 06_Lambda_threshold_and_KN_memo.md . Phase B deck: 07_Phase_B_Characterization_Slides_Explained.md + slides/CHAR_gamma_characterization.pptx .

9.4 Highest-value next experiments

COMPASS (agreed plans):

1. Army CAC refresh (G5)
2. Tenure formal Cox (G3)
3. G2 PNG regen for λ knockout slide
4. Three-domain composite visual
5. G4 contribution paragraph (VECTOR after Charles)

[CHARLES – reprioritize or add]

9.5 Prospective validation

COMPASS:

- Army: refresh Cell 11–12 on AWS when CAC returns
- Tenure: scrape bolster (20260901_COMPASS_to_PEER_tenure_scrape_bolster.pdf)
- MBB: division filter (blocked SCOUT)
- Big Fish: parked

10. Dissertation Narrative and Defense Deck

10.1 Existing outlines

COMPASS (newest first):

1. _DISPOSABLE_paper_flipbook_PD30.md
2. PAPER_Campaign_Plan.md
3. re_entry 01 – 04
4. plans/20260721_hero_model_reset.plan.md
5. _DISPOSABLE_paper_flipbook_PD30_FIGURE_DECK.pptx (talk skeleton)
6. _DISPOSABLE_paper_flipbook_PD30_FIGURE_INVENTORY.pptx (full catalog)

10.2 Candidate narrative

COMPASS: Acts 0→VI in flipbook: Frame → Army → MBB → Tenure → Mechanism → leave-one-out pedagogy (optional) → Limits/gaps.

[CHARLES – confirm order §4c]

10.3 Core versus backup

COMPASS (draft — Charles must confirm §4a):

Tier	Content
Must-show core	Army G1, MBB panel 9, tenure panel 9, Model.pptx, λ knockout G2, BINDING table
Supporting robustness	Army Cox partials, MBB panels 5/8, tenure perf story
Technical validation	pass_c_rho, grandchild slides, Phase B CHAR_* decks
Backup only	Big Fish 3×3s, football composite, legends

10.4 Dissertation versus paper

COMPASS: PD30 plan: **dissertation/defense first**, paper after; flipbook = paper-talk prototype. MBB honest-access narrative (Army origin, basketball stand-in) — flipbook slide 0.4.

[CHARLES – Alex-specific differences §4d]

10.5 Claims we cannot yet make

COMPASS:

- Causal peer effects / development channel separation
- Universal inverted-U magnitudes across domains
- Real leagues literally maximize **S_i**
- Bar-for-bar sim-to-empirical match
- Big Fish as primary legs

[CHARLES – add do-not-claim bullets §4e]

11. Figures, Slides, and Visual Assets

11.1 Existing decks

COMPASS (priority order):

1. **_DISPOSABLE_paper_flipbook_PD30_FIGURE_DECK.pptx** — **talk skeleton** (Acts 0–VI)
2. **_DISPOSABLE_paper_flipbook_PD30_FIGURE_INVENTORY.pptx** — **superset catalog**
3. **Model.pptx** — mechanism one-slide
4. **HEROs_and_PASSes/slides/CHAR_PD16_HAND.pptx** — Phase B
5. **CHAR_PD20_22_takeaways_memo_HAND.pptx** — POST-QC
6. **CHAR_PD21_MLE_fit_13_21_HAND.pptx** — ρ/MLE
7. **CHAR_grandchild_league_analysis.pptx** — LG diagnostics

Regen flipbook decks: **python scripts/build_flipbook_figure_deck.py**

Superseded: **CHAR_PD20_HAND_backup_20260817.pptx** ; archived fhero under **sports_sandbox/_archive/** .

11.2 Figure inventory

COMPASS: Yes — flipbook § Figure inventory + INVENTORY.pptx/HTML. Authoritative dirs:

- Army: **HEROs_and_PASSes/army_sandbox/**
- MBB: **sports_sandbox/data_story/** , **hero/** , **reigning_hero/**
- Tenure: **tenure_sandbox/data_story/** , **hero/**
- Model: **pass_b/** , **pass_c_rho/** , **pass_a/**

JSON manifests: **mbb_reigning_3x3_manifest.json** , **tenure_pd29_3x3_manifest.json** .

11.3 Figures needing rebuild

COMPASS:

- Army: confirm sandbox PNGs vs latest AWS export **[CHARLES]**
- G2: λ knockout side-by-side PNG missing from git (CSVs exist)
- Pre-POST-QC mg=0 HERO in old decks — avoid

11.4 Missing visuals

COMPASS:

- Three-domain crosswalk composite
- ASSIGN→SCORE→SELECT schematic (partial via Model.pptx; may need LG refresh)
- ρ×λ phase map
- Phase C prediction diagram (parked)

12. Code and Reproducibility

12.1 Canonical entry points

COMPASS:

Domain	Entry
Army	talent/talent_pipeline/520_pipeline_cox_working.ipynb
Army extract	scripts/extract_army_figures_from_520_notebook.py
MBB	sports/530_sports_pipeline.ipynb ; pass_a_empirical_bundle.py
Tenure	tenure/540_tenure_pipeline.ipynb ; tenure/scripts/
ASSIGN	sports/tier1_pool_assignment.py
Sim	sports/540_three_step_sim.ipynb
λ knockout	sports/scripts/pass_b_generative_knockout_bundle.py
ρ ablation	sports/scripts/540_rho_ablation_bundle.py
Flipbook decks	scripts/build_flipbook_figure_deck.py

12.2 Superseded code

COMPASS: Ignore `sports/archive/` (535–538D notebooks); `539_alex_model.ipynb`; root `talent_pipeline/` duplicate; MCP raw JSON notebook edits.

Naming trap: folder `pass_b/` = λ knockout sim; folder `pass_a/` = empirical hero; folder `pass_c_rho/` = ρ ablation (doc 04 “Pass B”).

12.3 Reproducibility

COMPASS:

Asset	Regenerable?	Gap
MBB 3×3 + HERO	✓	Needs local ESPN data
Tenure 3×3	✓	Needs tenure panel
Army G1	⚠	AWS/CAC or extract script
λ knockout G2	✓	PNG not committed
Flipbook PPTX	✓	build_flipbook_figure_deck.py

13. Agent Knowledge and Handoffs

13.1 Other agents

COMPASS:

Agent	Lane	Handoff
COMPASS	Sequencing, flipbook	PAPER_Campaign_Plan.md , COMPASS_AGENT_IDENTITY.md
VECTOR	Manuscript, theory	VECTOR_work/*.md
CODA	Army / talent	520_PIPELINE_COX_OVERVIEW.md
SCOUT	MBB / sim	sports_sandbox/README.md , 540_READ_ME_SIM.md
PEER	Tenure	TENURE_PIPELINE_OVERVIEW.md , 20260901-PEER_to_COMPASS_tenure_hero_mac_handoff.pdf

13.2 Recent handoffs

COMPASS: `_DISPOSABLE_paper_flipbook_PD30.md` ; `PAPER_Campaign_Plan.md` ; `transcripts/PD30_notes.md` ; tenure scrape PDFs Sep 2026; `SCOUT_and_COMPASS/20260827_SCOUT_to_COMPASS_2009_21_aperture.md` .

13.3 Unresolved disagreements

COMPASS:

- 520 notebook reigning copy: `talent/talent_pipeline/` vs AWS export dates
- LG vs Parent/Child for deck canonical ASSIGN
- Pass folder naming vs doc 04 labels — document clearly for VECTOR
- Army-forward story vs figure readiness (MBB/tenure ready now)
- Tenure metric: career rate reigning; annum pubs sensitivity remains

[CHARLES – any disagreements with Alex/CODA to flag?]

14. Prioritized Upload Manifest for VECTOR

Tier 1 — Read before first slide-placeholder outline

COMPASS:

```
3-Master_Plan/re_entry/_DISPOSABLE_paper_flipbook_PD30.md
3-Master_Plan/re_entry/PAPER_Campaign_Plan.md
transcripts/PD30_notes.md
3-Master_Plan/BINDING_Selection_is_its_own_step.md
3-Master_Plan/re_entry/01_The_Problem_in_Plain_English.md
3-Master_Plan/re_entry/02_Three_Kinds_of_Model.md

15. Final Executive Handoff

COMPASS draft — [CHARLES APPROVE each bullet]

1. **What have we discovered?** In Army officer promotion data, advancement vs **leave-one-out-style pool-minus-mean** in the senior-rater pool shows a **strong inverted-U** (strongest of three domains). Own top-block performance rises monotonically on a separate axis.
Evidence: `army_sandbox/ARMY_G1_*.png`, flipbook Act I.
2. **What have we replicated across domains?** The same **qualitative family** — advancement vs peer pond quality (leave-one-out) can rise through mid ponds then soften at the elite tail — appears in **NCAA men's basketball** (draft, weaker tail) and **R1 tenure** (decision cohort,

- graded signal). Evidence: MBB panel 9, tenure panel 9, manifests.
3. **What mechanism are we proposing? Minimal assign → score → select:** homophilic assignment places talent in ponds; **score** $S_i = A_i - \lambda \cdot L_C$ can embed congestion in ranking; **select** top K produces advancement scarcity. Environment $L_{net} = B - D$ is **not** the advancement step. Evidence: `Model.pptx`, `BINDING`, `540_READ_ME_SIM.md`.
4. **What has the simple model already demonstrated?** $\lambda=0$ vs $\lambda>0$ knockout shows congestion **in the score** can compress elite bins (qualitative POC; CSVs in `pass_b/`). p ablations show assignment geometry moves team congestion distribution (`pass_c_rho/`). Not bar-for-bar empirical match.
5. **What predictions are we about to test?** $\theta(K/N)$ threshold work open (`06_Lambda_threshold_and_KN_memo.md`); Phase C Alex magnitude parked; Army refresh when CAC returns; tenure formal Cox (G3); optional three-domain composite.
6. **Biggest unresolved threats before defense:** (a) causal identification not claimed — sorting/confounding; (b) Army own-TB ↔ pool-minus-mean correlation; (c) sim bins pool mean vs empirical leave-one-out; (d) tenure N sparse; (e) G1/G2 figure freshness; (f) contribution paragraph (G4) pending Charles.
