

DISPOSABLE — Tenure hero thread (2026-09-01)

Purpose: YOU ARE HERE for Charles + COMPASS tenure HERO work on Mac.

Campaign plan: `TENURE_HERO_Campaign_Plan.md`

Say `anchor` in chat to paste the table below.

YOU ARE HERE

Step	Task	Status
0	PEER handoff + Mac rsync verified	✓
1	Campaign plan + folder scaffold	✓
2	Run <code>tenure_pass_a_hero.py</code> → first HERO v0	✓ (2026-09-01)
3	Review plot with Charles; note caveats	✓ (QTL vs EW labels; censored memo for Alex)
4	Alex lock memo (Y, $\hat{A}$, F-HERO, generative scope, <code>censored-in-bin</code>)	→ NEXT
5	Act III ρ diagnostic	Pending
6	PEER scrape bolster (parallel, when scheduled)	Parked

Alex one-liner: Use **existing** tenure panel first; hero/F-HERO exploration before corpus expansion is the main story.

v0 lock (reminder)

- File: `faculty_panel_with_pools.jsonl`
- Filter: HIGH/MEDIUM + LOO
- Grain: person-level LOO mean
- Y: tenure rate among **resolved**; censored parked from **rates** but **in quantile rank**
- Bins: Q16
- Out: `tenure_sandbox/hero/`

Thread log

Date	Entry
2026-09-01	Thread opened; scaffold + campaign plan; awaiting first plot.
2026-09-01	Censored-in-quantile pros/cons → <code>TENURE_hero_pipeline.md</code> § for Alex; campaign plan item #6.
