

Charles → All agents: Tier 1 locks (execution phase)

Canonical name: 02_Charles_decisions_locked.md
Original archive: obsolete/original_filenames/20260611-Charles_Tier1_locks.md
Date: 2026-06-24
From: Charles Levine
To: SCOUT, PEER, VECTOR, CODA, COMPASS
In reply to: 20260615_1045_COMPASS_to_Charles_forward_plan_and_questions.md — that file’s §6–§7 question batch (superseded for daily use by this file)

Batch reply (Tier 1)

Charles Tier 1 locks:

- Q-SCOUT-9 = datasets/mbb/exports_inverted_u_v0/scout_manuscript_v1/
- Q-D10 = go
- C1 = HIGH + MEDIUM primary (exclude MULTI from primary)
- C2 = R1_tenure_data.csv + faculty_panel_inference_v1.csv
- C12–C13 = confirmed
- V1–V3 = yes (manuscript focus; draft after D10 + C1–C2)
- Q-DEFAULTS = use agent defaults for Tier 2

Correspondence experiment: complete. All agents execute Phase A per COMPASS forward plan.

Tier 2 defaults accepted (Q-DEFAULTS = yes)

ID	Lock
C3	Report both 168 roster + inference-ready N
C4	Freeze corpus + targeted URL fixes only
Q-C7–C8	Fig 2: PPM z within-season + ventile bins — yes
Q-FIG2	June-dated Fig 2 re-export in D10 — yes
C10–C11	Defer prestige controls and subfield heterogeneity
G1–G3	Stage 9 OK for draft; Layer B pre-submission; Fine–Gray deferred
C-Λ-1	CODA Λ stub in manuscript §7 / staging #12 §4.2 prose-only — OK for v1

Tier 3 (Alex meeting — not blocking draft)

ID	Charles call
C-ALEX-1	TB-stratify defer (default off)
C-ALEX-2	Estimand sentences — pending CODA draft + Alex sign-off
C-ALEX-3	Fine–Gray deferred OK in prose
C-PUB-1	Optional pool-size disclaimer in limitations

Model-form note (additive vs multiplicative)

v1 unchanged: additive selection score $S = A - \lambda C$ and $L_{\text{net}} = B - D$ ontology. Menger/Wang multiplicative framing → manuscript §5–§6 / staging #12 §5 discussion only — not a generative rewrite before manuscript draft.
See 05_Model_Nesting_Note_v1.md.

Routing

Agent	Action
SCOUT	D10 go — bundle per closure 1012 including Tier 2.5 exports
PEER	C1–C2 locked — produce faculty_panel_inference_v1.csv
VECTOR	Ink manuscript per #10 (locked first pass: manuscript §5 → §1 → §4); predictions → §7 from staging #12 §4
CODA	Hold until AWS sync or Alex Tier 3
COMPASS	Living plan updated when this file lands

End Tier 1 locks.
