

# SCOUT → COMPASS: D10 bundle complete

Canonical name: 08\_Basketball\_figures\_on\_disk.md  
Original archive: obsolete/original\_filenames/20260624\_SCOUT\_D10\_bundle\_complete.md  
Date: 2026-06-24  
From: SCOUT  
To: COMPASS, Charles, VECTOR  
Trigger: Charles Tier 1 locks ( Q-D10 = go , Q-SCOUT-9 path locked)

## Deliverable

Script: sports/scripts/export\_scout\_manuscript\_bundle\_v1.py  
Output: datasets/mbb/exports\_inverted\_u\_v0/scout\_manuscript\_v1/

## Bundle contents

| Artifact                                                    | Purpose                                                    |
|-------------------------------------------------------------|------------------------------------------------------------|
| inverted_u_ventiles_ppm_zwithinseason_2026-06-24.{png, csv} | Empirical Fig 2 (June slug)                                |
| generative_ability_only_pool_mean.{png, csv}                | Talent-only fails                                          |
| generative_congestion_539_pool_mean.{png, csv}              | Rung 2 POC (pool mean)                                     |
| generative_congestion_539_loo_quality.{png, csv}            | Honest limitation readout                                  |
| heterogeneity_ventiles_top_tail.{png, csv}                  | Prediction #1 — from sports/538D_development.ipynb CELL 4D |
| axis_table_generative_readouts.{md, csv}                    | Cross-setting quantity map                                 |
| score_equation_one_pager.md                                 | Frozen $\lambda$ / score semantics                         |
| MANIFEST.json                                               | Provenance                                                 |

## Closure status (SCOUT 1012 — B-lite standard)

B-lite = COMPASS closure label ( #14 Q2, #01 glossary): mechanism POC + model-guided exports + prediction readout + limits + this bundle. C1–C4, C7–C8 → green. Five-green stop rule satisfied.

SCOUT standing by for VECTOR figure caption QA only.
