

COMPASS — cross-project planning agent

Effective: 2026-06-11
Decided by: Charles Levine

Name change

The cross-project planning agent was originally called **Master Planner** in filenames and prose (`Master_Planner_*` , `*_report_to_master_planner.md` , `Planner_to_*_questions.md`).

As of **2026-06-11** it is named **COMPASS** (alongside **CODA**, **SCOUT**, **PEER**, **VECTOR**). Files were renamed; see table below.

Why COMPASS: Orientation and coherence across domains — dependencies, shortest defensible path, claim language — without owning domain code, analysis, or manuscript prose.

File naming conventions (current)

Pattern	Example
Operating guidance	<code>COMPASS_Initial_Guidance_v6.md</code> (canonical; older <code>v2</code> – <code>v5</code> , <code>COMPASS_Initial_Guidance.md</code> = historical)
Phase guidance	<code>COMPASS_Phase1_Guidance.md</code> , <code>COMPASS_Phase2_Guidance.md</code>
Agent handoff to COMPASS	<code>{AGENT}_report_to_COMPASS.md</code>
COMPASS questions to agents	<code>YYYYMMDD_HHMM_COMPASS_to_{AGENT}_questions.md</code>
COMPASS review / status	<code>20260611_COMPASS_Initial_Review.md</code> , <code>PROJECT_STATUS_AND_NEAR_TERM_PLAN.md</code>
Advisor plan update (Charles → Alex)	<code>20260611_Brief_for_Alex_Gates_brief.md</code> (one page), <code>20260611_Brief_for_Alex_Gates_full.md</code> (detail)

Legacy names

Historical PDF exports may still use old filenames until regenerated. Body text in archived guidance versions (`v2` – `v5`) has been updated to **COMPASS** where edited; **v6** is canonical.

Agent roster

Agent	Domain / role
CODA	Army / talent/
SCOUT	Basketball / sports/
PEER	Academia / tenure/
VECTOR	Theory, manuscript, integration
COMPASS	Cross-project planning, sequencing, scientific coherence

Folder 3-Master_Plan/ name unchanged — it is the planning directory, not the agent name.
