

Research Context Overview

Purpose

Provide future LLMs with background context for generating project-relevant commentary.

Core Interests

- Advancement Under Constrained Distinction
- Organizational selection systems
- Promotion processes
- Competitive environments
- Ranking systems
- Inequality generation
- Career dynamics

Recurring Mechanisms of Interest

- Amplification
- Cumulative advantage
- Assortative matching
- Relative evaluation
- Scarcity
- Reputation effects
- Information asymmetry
- Opportunity allocation

Questions of Continuing Interest

- How do small differences become large inequalities?
- When do rankings reveal differences versus create them?
- How do organizations allocate opportunity?
- How do evaluation systems shape outcomes?
- What mechanisms generate advancement?

Desired Companion Volume Features

- Strong mechanism extraction
- Transferable conceptual frameworks

- Research implications
- Connections to organizational systems
- Identification of hidden assumptions

Example Thinkers and Themes

- Menger: Talent, inequality, amplification
- Barabási: Success, networks, visibility
- Merton: Cumulative advantage
- Rosen: Superstar effects
- Coase: Why firms exist
- Frank: Status and incentives

Working Assumption

Observed outcomes are often produced by interacting systems rather than a single underlying cause.
